MD. SHOWKAT ISLAM SAKIB

showkatsakib02@gmail.com | 01965514357 | Portfolio | ShowkatSakib | LinkedIn

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on industry experience as a Software Engineer, building scalable APIs and interactive web applications. Passionate about solving real-world problems through data-driven engineering while utilizing modern frameworks and AI-assisted development tools to deliver high-quality, full-stack solutions.

Educational Background

Bachelor of Science in Computer Science and Engineering 2022 – 2026
American International University Bangladesh | CGPA: 3.96 (out of 4.00)

EXPERIENCE

Software Engineer Intern, NN Services & Engineering Ltd (NNSEL) *Feb 2026 – May 2026*
Dhaka, Bangladesh

- Developed web pages and features for the NNSEL platform using React and Node.js/Express.
- Gained hands-on experience with JWT authentication and database integration.
- Collaborated using Git feature branches, pull requests and code reviews as part of the SDLC.

Projects

Construction Tracker - Real Estate ERP React, Node.js/Express, PostgreSQL [Live] [GitHub]

- Developed dashboards for project, task, inventory and budget management with role-based access control.
- Built RESTful APIs and WebSockets with JWT authentication for live task tracking, material usage alerts and budget-vs-actual analysis.

SmartRide BD - AI Powered Ride Fare Estimator React, Flask, Tailwind CSS [Live] [GitHub]

- Developed an interactive dashboard for fare comparison across multiple transport options.
- Integrated traffic, weather and time-of-day factors for dynamic fare estimation and recommendations.

Grocery Shop Management System HTML, CSS, JS, PHP, MySQL [Live] [GitHub]

- Developed a full-stack Admin and Customer modules with authentication and role-based dashboards.
- Implemented product management, order processing, search/filtering and low-stock alerts.

Inventory Management System C#, ASP.NET Core, SQL Server [GitHub]

- Designed an N-Tier (API, BLL, DAL) RESTful Web API for product, supplier and order management.
- Implemented advanced filtering, low-stock alerts, stock analysis, order tracking and supplier order history.

Blood Bank Management System - Desktop Application C#, SQL [GitHub]

- Built multi-role modules to manage profiles, blood stock and transfusion records.
- Implemented location-based donor search functionality to streamline donor-patient matching.

Research Experience

Explainable Deep Learning for Osteoporosis Prediction from Knee X-Rays Python

- Built a hybrid DenseNet121–EfficientNetB0 model with SE attention, achieving ROC-AUC of 0.90.
- Achieved high Recall of 0.91 and applied Grad-CAM++ for interpretable knee X-ray predictions.

Technical Skills

Programming Languages	C#, Java, C++, Python, R
Frontend Development	React, HTML, CSS, Tailwind CSS, JavaScript
Backend Development	Node.js, Express.js, ASP.NET Core, .NET Framework, PHP
Databases	PostgreSQL, MySQL, SQL
Data Science & ML	Data Analysis, TensorFlow, CNNs, Explainable AI, Predictive Modelling
Tools & Platforms	Git, GitHub, Visual Studio, VS Code, Figma, Vercel, Render

Awards

Dean's Award: Fall 2023–24, Spring 2023–24, Fall 2024–25 (AIUB)
