MD. SHOWKAT ISLAM SAKIB

01965514357 | showkatsakib02@gmail.com | ShowkatSakib | LinkedIn

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on industry experience as a Software Engineer, building scalable APIs and interactive web applications. Passionate about solving real-world problems through data-driven engineering while utilizing modern frameworks and AI-assisted development tools to deliver high-quality, full-stack solutions.

Educational Background

Bachelor of Science in Computer Science and Engineering 2022 – 2026
American International University Bangladesh | CGPA: 3.97 (out of 4.00)

Awards

Dean's Award: Fall 2023–24, Spring 2023–24, Fall 2024–25 (AIUB)

EXPERIENCE

Software Engineer Intern, NN Services & Engineering Ltd (NNSEL) *Feb 2026 – May 2026*
Dhaka, Bangladesh

- Built full pages and feature modules for the NNSEL web platform using React and Node.js/Express, contributing to production features and internal tools
- Delivered assigned prototypes including a full-stack Todo application with JWT authentication and database persistence
- Collaborated using Git feature-branch workflows, pull requests and code reviews while participating in the full SDLC

Projects

Construction Tracker - Real Estate ERP React, Node.js, Express.js, PostgreSQL [Live] [GitHub]

- Built a full-stack construction ERP featuring role-based access control, automated workflows and real-time dashboard analytics for projects, tasks, inventory and budgeting.
- Developed secure RESTful APIs and WebSockets using JWT authentication to enable live task tracking, material usage alerts and budget-vs-actual cost analytics.

SmartRide BD - AI Powered Ride Fare Estimator React, Flask, Tailwind CSS [Live] [GitHub]

- Built a Dhaka ride fare prediction system using Haversine GPS distance calculation and an interactive Recharts dashboard for multi-transport comparison.
- Developed a dynamic surge pricing engine and context-aware recommendation system incorporating traffic patterns, weather and time of day.

Grocery Shop Management System HTML, CSS, JavaScript, PHP, MySQL [Live] [GitHub]

- Developed a full-stack Admin and Customer modules with authentication and role-based dashboards
- Implemented product management, order processing, search/filtering and low-stock alerts

Inventory Management System C#, ASP.NET Core Web API, SQL Server [GitHub]

- Designed an N-Tier architecture RESTful Web API (API, BLL, DAL) to manage products, suppliers and orders with advanced filtering and status tracking.
- Implemented features including low-stock alerts, top stock analysis, supplier order histories and delivery updates.

Blood Bank Management System - Desktop Application C#, SQL [GitHub]

- Built multi-role modules (Donor, Patient, Employee, Admin) to manage profiles, blood stock and transfusion records.
- Implemented location-based donor search functionality to streamline matching and operations.

Indoor Hospital Management System - Database Design Oracle 10g, MySQL [GitHub]

- Designed relational schemas for patients, appointments and medical histories
- Ensured data integrity, reliability and efficient query performance

Research Experience

Explainable Deep Learning for Osteoporosis Prediction from Knee X-Rays Python

- Built a hybrid DenseNet121–EfficientNetB0 model with SE attention, achieving ROC-AUC of 0.90
- Achieved high Recall of 0.91 and applied Grad-CAM++ for interpretable knee X-ray predictions

Technical Skills

Programming Languages	C#, Java, C++, Python, R
Frontend Development	React, HTML, CSS, Tailwind CSS, JavaScript
Backend Development	Node.js, Express.js, ASP.NET Core, .NET Framework, Flask, PHP
Databases & ORM	PostgreSQL, SQL, MySQL, Drizzle ORM, Relational Database Design
Software Architecture	N-Tier Architecture, MVC Architecture, OOP
Data Science & ML	TensorFlow, CNNs, Explainable AI, Transfer Learning, Predictive Modelling
Tools & Platforms	Git, GitHub, Visual Studio, VS Code, Figma, Vercel, Render
